

Data and Code for **Does Vertical Integration Decrease Prices? Evidence from the Paramount Antitrust Case of 1948**, *American Economic Journal: Economic Policy* by Ricard Gil.

Hello. This short readme file describes the data and code used in the paper. First unzip all of the files.

Final\_do\_file.do  
Data\_2012\_0245.dta

The data comes from old weekly Wednesday Variety issues from January 3<sup>rd</sup> 1945 to December 28<sup>th</sup> 1955. The paper contains a careful description of where to locate the data. Here I provide the final data set that is needed to reproduce all my results. Before running .do file, change the root directory to the directory where the code and data are located.

The “Final\_do\_file.do” file provides the code and data transformation necessary to reproduce each table and figure in the paper. See the .do file notes and Table 4B in the paper for the description of all variables used in the regressions.

Please do not hesitate to contact me if I may provide further clarification. Best Wishes,

Ricard Gil
